OPULUS Catalog

Valid to: 2022-12-31

Opulus introduced the PyroButton System (PBS) – *Temperature & Temperature/Humidity data-loggers, software, high-capacity docking stations, calibrators and accessories* - to the market 15+ years ago. We have provided best-in-class solutions for the medical device, sterilization and pharmaceutical industries; the users agree, as proven by the testimonials ([see testimonials](#)). Our aggressive & innovative R&D efforts reached a new milestone with the advanced PyroButton-X/System (PBX/S) **sustainable and environmentally friendly high-performance** family of PBX data-logger products. PBX/S represents a new paradigm for advanced process monitoring, regulatory compliance, economics, and optimum decision making.

- PBX is the smallest – 17mm diameter x 7.5mm height – **sustainable**, high-performance data-logger on the market
 - Battery and sensors are factory replaceable, optimized by Opulus exchange policy
- Improved stainless steel housing and advanced seal technology protects the electronics from corrosive environment,
- Increased memory capacity by more than 30-fold provides higher data-load and improved data management, such as unique quality marker signature for each data-logger,
- Smart mission management supports smart data acquisition for measurement optimization,
- New high performance/high-throughput programmer/reader enhanced with intelligence for functional operation and positional recognition of the PyroButtons,
- Advanced application software – PyroButton-SQL v.4 – includes haptic type graphic user interface, MS SQL 16 database engine, multiple sensors – temperature, humidity, pressure, Ethylene Oxide, VOC, etc. – support and new query models,
- Compare against the competition.

Products:

- PyroButton-X self-powered data-loggers
- iPBX programmer/reader adapters
- PyroButton software
- PyroButton calibration/verification Systems

Warranty periods:

- Calibrated data-loggers: 1 year warranty (Opulus condition in Manual) from date of delivery
- Calibration/Verification systems: 2 years warranty (Opulus condition in Manual) from date of delivery
- iPBX docking stations: 3 years warranty (Opulus condition in Manual) from date of delivery
- Software: Lifetime warranty (Opulus condition in Manual); upgrades & updates are not included.

PyroButton data-logger packages							
100-PKX-005-100	<p>Sterilization Process Management - Steam Package. A 21 CFR Part 11 compliant System with eManual & eTutorial.</p> <p>Includes:</p>  <p>(1) 4 x PyroButton-X/PE - Calibrated, self-powered temperature device. Temperature range 0 to 150°C; Temperature resolution ±0.015°C; Calibrated Temperature accuracy (uncertainty) ±0.1°C. Pressure range 1 to 700 kPa; Pressure resolution 120Pa. Memory capacity: 59800 recorded data points. Calibrated at 5-points relative to NIST reference or equivalent International Reference. Measurements are corrected relative to the calibration data. Data integrity protection inclusion for 21 CFR Part 11 requirement. (2) iPBX-N28 Intelligent USB high speed Docking Station with automatic recognition of PBX positions. Suitable for parallel programming /data-download for 28 PyroButtons and PyroButtons-X family. (3) PyroButton-SQL v.4 software with 21 CFR Part 11 compliance. Windows 10 compatible. Includes 2016 MS SQL Express with SPC (includes: Sterilization, Applications, Basic, Clean Room, Equipment, Facility, Meteorological, Process, Stability chamber, Transportation, Container/Closures modules; provides heat & moisture distribution map, loading effects, container/closure evaluation, PQ, and much more. Built-in automatic correction of measurement based on the calibration data. Signal processing program module for optimization of signal smoothing for the reduction of inherent noise of applicable sensors' measurements, which improves the reliability of results. Built-in uncertainty of measurement calculation). (4) IQ-OQ-PQ & 21 CFR Part 11 Verification Protocols. 1 workstation license</p>	12,465 /package	12,465 /package

<i>PyroButton software for Self-powered temperature & humidity monitoring system</i>			
100-PBX-007-020E	PyroButton-X Simple software for PyroButton-X data-loggers. <i>Windows 10 compatible</i> PBX Simple is an effective solution for self-powered PyroButton-X (PBX) data-logger temperature, humidity, and pressure measurements, including validation, mapping, monitoring, sterilization, and stability studies. This is a file version software, which means there is no database behind the software.	400/license	400/license
100-PBX-007-023E	PyroButton-SQL v.4 software with 21 CFR Part 11 compliance. <i>Windows 10 compatible (network version available) with 2016 MS SQL Engine and SPC.</i> <i>New - expanded sensor capabilities: Supports Temperature, Humidity, Pressure, Ethylene Oxide, VOC and others, as added.</i> Includes 2016 MS SQL Express with SPC (includes: Applications, Basic, Clean Room, Equipment, Facility, Meteorological, Process, Stability chamber, Sterilization, Transportation, Container/Closures modules; provides heat & moisture distribution map, loading effects, container/closure evaluation, PQ, and much more. Built-in automatic correction of measurement based on the calibration data. Signal processing program module for optimization of signal smoothing for the reduction of inherent noise of applicable sensors' measurements, which improves the reliability of results. Built-in uncertainty of measurement calculation). 21 CFR Part 11 compliant 1 workstation license. <u>Includes:</u> eManual, eTutorial IQ-OQ-PQ & 21 CFR Part 11 verification protocols.	14,532 /license	14,532 /license

Calibrators & Calibration Services			
100-ICE-221-100	<p>PyroButton-TQM v.4 with PBC-TH28 A 21 CFR Part 11 ISO 17025 compliant system Windows 10 (32/64bits) compatible. Suitable for the temperature & humidity calibrations of PyroButton (legacy) and PyroButton-X (new advanced) data-loggers.</p> <p>Specification:</p> <ol style="list-style-type: none"> Capacity: 28 x PyroButtons or PyroButton-Xs Temperature Dynamic Range: -30 °C to +150 °C with Low Temperature Circulator (see, Opulus Water Chiller) Temperature accuracy (uncertainty): u ≤0.1°C (-30°C .. 150°C), Humidity via salt slush dynamic range at 25 °C: 3.7 %RH to 93.6 %RH Humidity via salt slush accuracy: u ≤1.3%RH at 25°C (with Salt Slush as humidity reference) Humidity via OpHumGen dynamic range at 25°C: 10 %RH to 90 %RH Humidity via OpHumGen accuracy: u ≤1%RH at 25°C (with OpSens-RH as humidity reference) <p>Includes:</p> <ul style="list-style-type: none"> ✓ Calibration Operating System with Total Quality Management ✓ SQL 2016 Data Base Engine (network version available) ✓ PyroButton Calibration & Verification Life Cycle Management ✓ PBC-H28 calibrator's Calibration & Life Cycle Management ✓ Automatic generation of Calibration Certificates ✓ Integration of multiple Opulus calibrators & calibrator types ✓ CAPA & OOS Management ✓ Integrated Compliance Management ✓ Integrated Material Management ✓ High performance digital Humidity Sensor ✓ Optional Humidity Generator <p>Can be integrated with PyroButton softwares for fully automatic correction.</p>	28,728 /license	28,728 /license
100-ICE-222-110	<p>Opulus Humidity Generator (OpHumGen) OpHumGen maintains a given relative humidity for calibration of PyroButton data loggers with PBC-TH28 calibrator. All functions of the OpHumGen are controlled by the PBC-TH28 measurement program (part of Opulus PyroButton-TQM framework).</p> <p>Includes:</p> <ol style="list-style-type: none"> Opulus Air Compressor (OPAC) is included Relative Humidity Range: (10-40°C) - 10-90%RH Relative Humidity Range: (40-50°C) - 10-85%RH Temperature Range: (10-50°C) 	17,640 /each	17,640 /each
100-ICE-229-110	<p>Opulus Air Compressor (OPAC) The OpHumGen and the OPAC work together with the PBC-TH28 Calibrator. All functions of the OPAC are controlled by the PBC-TH28 measurement program (part of Opulus PyroButton-TQM framework).</p>	2,884 /each	2,884 /each
100-ICE-422-110	<p>Opulus Water Chiller (OWC) OWC can be used for operating the PBC-TH28 calibrator below 0°C. All functions of the OWC are controlled by the PBC-TH28 measurement program (part of Opulus PyroButton-TQM framework).</p>	5,029 /each	5,029 /each

100-ICE-322-110	OpiCal suite OpiCal suite is a sophisticated real-time temperature calibration system for the PBC-TH28 calibrator. Includes: (1) 32 pcs OpiCal Reference Sensors (2) 1 pc OpiCal Chamber Calibration Insert (CCI/28)	11,935 /each	11,935 /each
100-ICE-001-100A	PyroButton/PyroButton-X data-logger temperature re-calibration with verification <i>NOTE: If the number of data-loggers are 10 or less add \$150 set-up fee</i>	56 /point	56 /point
100-ICE-001-100B	PyroButton/PyroButton-X data-logger temperature re-calibration <i>NOTE: If the number of data-loggers are 10 or less add \$150 set-up fee</i>	45 /point	45 /point
100-ICE-001-100C	PyroButton/PyroButton-X data-logger humidity re-calibration with verification <i>NOTE: If the number of data-loggers are 10 or less add \$150 set-up fee</i>	68 /point	68 /point
100-ICE-003-100A	PyroButton/PyroButton-X data-logger humidity re-calibration <i>NOTE: If the number of data-loggers are 10 or less add \$150 set-up fee</i>	51 /point	51 /point
100-BRP-004-100S	PyroButton-X data-logger battery replacement & 3-point calibration <i>Performed by Opulus in Hungary via 3 options: (1) 2 business weeks (battery change + 3-point calibration at \$255), (2) 2 business weeks (battery change + 5-point calibration at \$275), (3) via USA or Hungary/1 business week exchange/replacement with 3-point calibration & 5-point verification at \$280)</i> <i>Note: Add \$45 + 1 business week, if sensor change is required.</i>	\$255	\$255

Testimonials

"We have now been working with the Pyrobutton system for about 18 months. The previous system we were working with was significantly more expensive to purchase and to maintain but we used it for many years as we considered it to be the best product on the for our application. However, I now think the Pyrobutton system is far superior than anything else currently available, it beats all other systems in every department especially in the ease of use, data analysis and the time spent to calibrate."

Sterigenics

"I would like to tell you that Pyrobutton system is really useful, semiautomatic and paperless; is a cutting edge system that changed completely the level of service of Metrology (my department) to Validations (final users)."

Head Metrology, Becton Dickinson, Mexico

"Your organization is a game changer around EO and for other processes as well"

Sterilization Technology Director, Zimmer Biomet
